

2. One Page ORIGAMI Book

also called an "Origami Pamphlet"

The one page origami book is a simple way to make an eight paged book from one sheet of paper. Variations can be made by changing the size of the paper, or making variations in the cut (As in the house, plane and castle book, pg 3 & 3).

Writing Ideas for the one page origami:

* **Make up a story** with seven scenes, write it in your book and put at least one illustration on each page. (First page will be the book cover.)

* **Record Facts.** Cover two pieces of notebook cardboard with a patterned paper to glue to the front and back of your origami booklet to give it a hard cover. Fill your book with drawings and descriptions of objects that have patterns in your home.

There are several U-tubes showing how to do this if you'd like to set up a "station" for kids to teach themselves. Here's one I like with only visual directions.
